

OPTICAL TECHNICIAN

JML Optical, LLC, located in the Penfield, NY area of Rochester, is recognized as being a lead engineering optical solutions provider, particularly to customers in the aerospace and defense, medical, metrology and highly engineered industrial arenas. View our website, www.jmloptical.com, to see the products that are created by our multi-talented employees.

We have an **immediate** opening for an Optical Technician with either entry-level or advanced skills in this career. The technician will play a critical role by producing high-quality optical components that will be used in a variety of capacities throughout our customers' different industries worldwide. **This is currently a day-shift position.**

Job Expectations:

- Accurately focus on cylindrical optical elements.
- Performs grinding and polishing to a high standard using conventional methods.
- Independently programs and runs a variety of machines that grind, polish and center.
- Effectively use high-tolerance measuring tools.
- Perform cleaning and cosmetic inspection of finished product according to customer requirements.

Skills Requirements:

- Manual dexterity and hand/eye coordination
- Basic math skills
- Ability to follow instructions and interpret blueprints
- Proven inspection capability, particularly fine detail
- Experience running high-tolerance machines

Benefits:

JML Optical recognizes the importance of recruiting and maintaining the best talent. Therefore, we offer full-time employees an excellent benefits package and work environment, specifically:

- Competitive pay
- Generous Paid Time Off within your first year of employment
- A variety of Medical plans with a generous company contribution
- Monthly lunches with our President and top management to stay connected to our business success
- A mature, inclusive workforce who value a balance of work and home life.
